1.0 The formation of the team

Our team consists of five members. Our leader is Irfan Izzuddin Bin Azmi and the members are Simon Roy, Md Muntasir Ul Hakim, Muhammad Fakhrol Bin Hassan, Mujahid Bin Abdullah Omar Wahbi, Irfan Izzuddin Bin Azmi. We got to know one another before we required to form a team for group assignment. Thus, we decided to form a group for the assignment as we think it's better to cooperate with friends. Regarding the leader selection, Irfan Izzuddin Bin Azmi has more experience in Java among the five of us so we all decided that he would be able to lead the team well. And yes, he did.

2.0 Role and Assigned work for each of the members

Role	Member
Leader, Lead-Programmer, Program Tester	Irfan Izzuddin Bin Azmi
Leader assistant, Lead-Programmer, Database Manager, Program Tester	Muhammad Fakhrol Bin Hassan
Report making, Sub-programmer	Md Muntasir Ul Hakim
Group tasks planner, Report making, Sub-programmer	Simon Roy
Report making, Sub-programmer, Program Tester	Mujahid Bin Abdullah Omar Wahbi

Group member	Assigned Work
Irfan Izzuddin Bin Azmi	● Main Project Planner ● Main data frame ● Combine and integrate all the codes ● Technical Report ● Primary Reviewer for The Project Assignment and Report

Mujahid Bin Abdullah Omar Wahbi	• User Manager • Deposit Interest Predictor • Data Visualization with Graphs(Extra Feature) • Technical Report
Simon Roy	• Savings Manager • Transaction Manager • Managerial Report • Technical Report
Muhammad Fakhru Bin Hassan	• Data Storage • Filter and Sorting on History(Extra Feature) • Technical report • Secondary Reviewer for The Project Assignment and Report
Md Muntasir Ul Hakim	• Loan Manager • Reminder System for Loan Repayment(Extra Feature) • Password Hashing(Extra Feature) • Technical Report

4.0 Problem & Solution

4.1 The Problems Faced in Accomplishing the Assignment

1. Conflicting schedules was the biggest problem as coordinating meetings or collaborative efforts can be difficult when members have different availability.
2. Lack of clear communication leads to misunderstandings, missed deadlines, and half baked efforts.
3. The questions required a deep and strong understanding of Java which was considered a big challenge for us.
4. A lot of errors happen while integrating all the classes.
5. Hard to handle the data as we use CSV as our data storage instead of database.

4.2 Solutions

1. We distributed the works according to each individual's strengths and abilities of every member.
2. We created a WhatsApp group for discussions related to group assignments.
3. Open meeting 2-3 times per month to make sure everyone is on the right path and check the assignment progress.
4. Debug one by one by making error handling to know what's the error.
5. Study and understand carefully on how to read, write and export files using Java.

5.0 Other Issues Arised

1. There are a lot of program bugs that are available while making this project.
2. Our extra features had many malfunctions and it was a struggle to get it to work the way we wanted it to.
